25,000

1 LITRE

FUNGUS GNAT PREDATORY MITES
HYPOASPIS MILES

Gently shake shipping tube to mix contents. Remove lid.
Distribute 1/4 to 1/2 teaspoon of carrier and predators around roots
of every second plant throughout the greenhouse.
Place empty container among plants to release remaining predators.
General release rate is 50 / m².

HOLD AT ROOM TEMPERATURE - DO NOT CHILL
