Pure Potato

A limited Generation Seed Farm producing Pre-Nuclear potato stock and up to Generation 2. It originated in 1987 to produce disease free seed potatoes using tissue culture techniques. Minitubers are developed in an insect-proof greenhouse, before growing them in the field. Seed potatoes may be purchased at any stage starting from plantlets to minitubers; and up to Generation 2 seed potatoes. New varieties are continually being cleaned up via meri-stem and tissue culture for private contracts, or for mass production to sell to other seed or commercial growers.

9020 Jackman Road, Lynden, WA 98264

Fourth Corner Nurseries

Fourth Corner Nurseries was established in 1982 and is located in the coastal lowlands of Whatcom County, Washington. A wholesale grower of native plants with 60 acres under production. Their experience with native plants began in 1987. At the time we were looking into bare root crops we could produce that were best suited to our sandy loam soils Producing over 250 species of native trees, shrubs, perennials, sedges and grasses as seed bed and cutting produced, field grown bare root seedlings, transplants, balled and burlapped and to a limited extent container stock.
